Member.—Will sites be granted free ?

The Dewan.—Yes.

The Member.—The members will no doubt be glad to build if sites are granted. They will try.

Subject No. 128.

Compulsory introduction of Survey Settlement into Inam villages.

Summary of discussion.—The detail survey of Inam villages and the introduction of the settlement therein are now optional with the Inamdars. For the better collection of revenue and for the better management of the Inam villages themselves, the introduction of the Survey Settlement should be made obligatory on the Inamdars. Very often some of the sharers consent but the others refuse. The Survey Settlement cannot be introduced unless all consent, not even if the majority consent.

Dewan's reply.—(After discussion and consultation with Mr. Chentsal Rao and the Survey Superintendent). Partition gives them some relief. More than this is not possible under existing law. It is a doubtful question whether refusal of Survey should not be a ground for partition by Government in the case of Inam villages which were given out as Inam in Vrittis.

Subject No. 129.

Investiture of Belur Amildar with powers under Act XIII of 1859 in the Taluk.

Summary of discussion.—For purposes of Act XIII of 1859, the Belur Taluk is under the jurisdiction of the Amildar of Manjarabad Taluk. Complainants have thus to go to Saklespur and are put to much inconvenience. It is therefore desirable to confer the necessary powers on the Amildar of Belur.

Dewan's reply.—The point is noted for consideration and if possible the Belur Amildar will always be a person qualified to exercise the powers in question.

Subject No. 130.

Repairs to Belur Temple.

Summary of discussion.—The large temple at Belur is in need of repair. The needful repairs should be ordered to be carried out with grants from the Muzarayi General Surplus.

Dewan's reply.—The temple is one of general importance and has therefore a claim on the Muzarayi General Surplus. The Deputy Commissioner will be asked to report what repairs are necessary.

Subject No. 131.

Official remuneration or Mirasi to Kulavadis in Hassan District.

Summary of discussion.—Public work connected with Police, Revenue and preservation and repair of boundary marks suffers in consequence of Kulavadis in some places not having Inam lands or other official remuneration. They should be remunerated by Government or Mirasi should be ordered to be paid by the raiyats. Reference is here made particularly to the Marur Hobli.

Dewan's reply.—The point is noted for enquiry and consideration. (See also Subjects Nos. 56 and 163.)

Subject No. 132.
Village water works.

Summary of discussion.—Water should be brought into villages from tanks through pipes with the aid of contributions from villagers.

Dewan's reply.—This is far too large and expensive a project to be practical. It will be far too expensive to be undertaken, and villagers cannot contribute any appreciable portion of the cost.

Subject No. 133.
Conservancy of the road side Tank at Arkalgud.

Summary of discussion.—The small tank by the road side at Arkalgud which contains very good drinking water requires to be conserved and kept clean.

Dewan's reply.—The Deputy Commissioner will be asked to see to this. It is a first charge upon Municipal Funds and next on Local Funds under "Miscellaneous Public Improvements."

Subject No. 134.
Musafirkhana for Hole'-Narsipur.

Summary of discussion.—A Musafirkhana is required for Holé-Narsipur.

Dewan's reply.—A project is in hand for this work.

Subject No. 135.
D. P. W. Projects.

Summary of discussion.—The following projects of public utility were proposed by Representatives and noted for consideration in the Public Works Department :—

(*a*). The reconstruction of the anikats across the Hemavati near Holé-Basavanhalli in Arkalgud Taluk, and near Ranagatta in Belur Taluk across the Yagachi, which would prove beneficial to Government and to the raiyats and improve the water-supply to the town of Hassan.

(*b*). Conversion of the Malali Anikat channel as feeder to lower tanks, instead of keeping it as an irrigating channel which is not likely to prove successful.

(*c*). A cross road from Grama to Malali (in Grama Sub-Taluk) and Kuncha (in Holé-Narsipur Taluk) both of which are important market places.

(*d*). Bridges and tunnels on the Kavakatte-Huliyar Road (on which the traffic is heavy).

(*e*). Irrigating sluice to Timmappanayakankere Tank in Arsikere Taluk.

(*f*). Cross road to Bherya *viâ* Marur and Halli Mysore in Arkalgud Taluk.
